

Основни CRUD операции:

Create
Read
Update
Delete

Примери:

```
CREATE TABLE authors (  
  first_name varchar(20),  
  last_name varchar(20),  
  ...  
);
```

```
SELECT * FROM authors WHERE id = 1;
```

```
SELECT * FROM readers WHERE start_date = '2024-11-14';
```

```
INSERT INTO authors (first_name, last_name)  
VALUES ('Peter', 'Mayle');
```

ALTER TABLE – променя настройките на колоните в самата таблица

```
ALTER TABLE table_name  
ADD column_name datatype;
```

```
ALTER TABLE readers  
ADD Email varchar(255);
```

...

```
ALTER TABLE readers  
DROP COLUMN Email;
```

...

```
ALTER TABLE table_name  
RENAME COLUMN old_name TO new_name;
```

```
ALTER TABLE authors  
RENAME COLUMN nationality TO language;
```

В някои версии на SQL RENAME TO не работи

```
ALTER TABLE authors  
CHANGE COLUMN nationality language ENUM('BG', 'EN', 'DE', 'RU', 'FR');
```

...

```
ALTER TABLE table_name  
ALTER COLUMN column_name datatype;
```

UPDATE – промяна на стойностите в самите клетки на таблицата

```
UPDATE table_name
SET column1 = value1, column2 = value2, ...
WHERE condition;
```

```
...
UPDATE readers_cards
SET end_date = '2024-11-28'
WHERE start_date = '2024-11-14';
```

```
DELETE FROM readers_cards
WHERE start_date = '2024-11-14';
```

...

```
SELECT * FROM authors
WHERE id_author <=3;
```

...

AS - псевдоним, това, което се показва като име на колона в заявката.

```
SELECT id_book AS номер,
Title AS заглавие
FROM books;
```

...

```
SELECT id_book AS номер,
title AS заглавие
FROM books;
```

...

Ако са 2 думи или повече с интервали, слагаме кавички:

```
SELECT first_name AS 'Малко име'
FROM AUTHORS;
```

...

```
SELECT
    CONCAT(first_name, ' ', last_name) AS fullname
FROM
    authors;
```

...

DISTINCT - премахва повтарящи се записи

```
SELECT DISTINCT id_book, title
FROM books
WHERE id_book = 'en02';
```

```
SELECT title, price
FROM books
```

```
WHERE price >= 10.00;
```

```
...
```

```
SELECT title, price
```

```
FROM books
```

```
WHERE price BETWEEN 10.00 AND 20.00;
```

```
...
```

```
SELECT title
```

```
FROM books
```

```
WHERE NOT (id_book = 'bg01' OR id_book = 'bg02');
```

```
...
```

```
SELECT title
```

```
FROM books
```

```
WHERE id_book IN ('bg01', 'bg02', 'bg03');
```
