| 14 -<br>Ива        | Нямаш методи в Main() – може би не ти е стигнало времето. Като грешка – абстрактните методи нямат тяло и това е изписано даже в съобщението.                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 5 |
| 15 –<br>Иван<br>Н. | <p>Перфектен код, само вградени методи, единствено можеше да ги изнесеш извън Main(), но предвид времето, това не е проблем.</p> <pre> Packaging slowest = packages.OrderByDescending(p =&gt; p.WrapTime).First(); Console.WriteLine("Най-бавна за опаковане:"); slowest.DisplayInfo(); Console.WriteLine(\$"Време: {slowest.WrapTime} минути."); double averageBoxTime = packages.OfType&lt;BoxPackaging&gt;().Average(b =&gt; b.WrapTime); Console.WriteLine(\$"Средно време за BoxPackaging: {averageBoxTime:F2} минути."); var largePackages = packages.Where(p =&gt; p.Size == "голям"); </pre> | 6 |

16 –  
Иван  
П.

Не си дописал методите – статичният Total се извиква от името на класа

5

```
7  static void Main(string[] args)
8  {
9      List<Packaging> packages = new List<Packaging>();
10     packages.Add(new BoxPackaging("Голяма", 8, true));
11     packages.Add(new BoxPackaging("Малка", 10, false));
12     packages.Add(new BagPackaging("Средна ", 20, "Фоліо"));
13     packages.Add(new BagPackaging("Много голяма", 40, "Найлон"));
14
15
16     Console.WriteLine($"Общият брой е {TotalPackages}");
17 }
```

| 22 - Ралица   | <p>Единствената от всички, която си използвала директно .maxBy(), вместо .OrderBy().First(). Една грешка имаш – тя е от буква на кирилица в изписването на .GetRecipeStep(), предполагам, че някое от е-тата, затова ползвай IntelliSense. На същото място, понеже самият метод .GetRecipeStep() е void и печата с CW, няма как да го вкараме в друг CW – стават 2 CW един в друг и затова също хвърля грешка. Трябвало е директно да го извикаш, както е показано.</p>               | 6 |

Не си дописала Total. Логиката е чудесна, грешките не са фрапантни, просто още малко упражнения.

```

96
97 Console.WriteLine($"Общ брой призовани сладкиши: {ChristmasSweet.TotalSweetCount}");
98
99
100

```
