

Shakesperiada

ASP.NET Core Web App (Model-View-Controller) C# Linux macOS Windows Cloud Service

Project name
Shakesperiada

Location
D:\Exercises\12 class\ ...

Solution name ⓘ
Shakesperiada

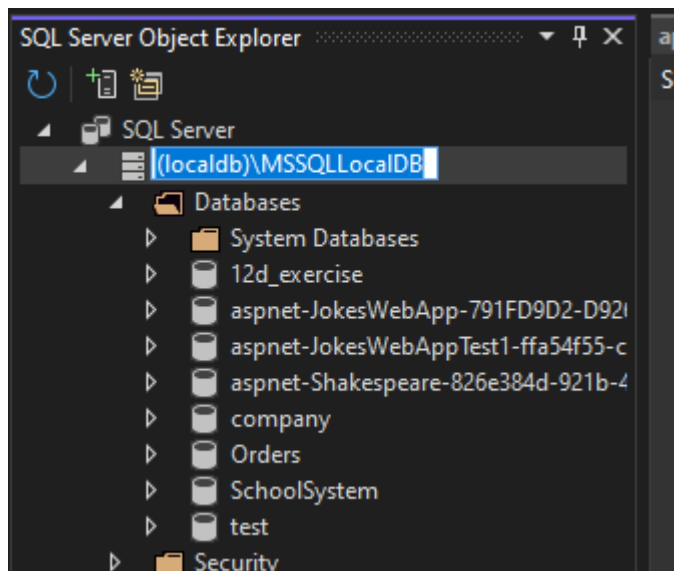

☒ Place solution and project in the same directory

Framework ⓘ
.NET 5.0 (Out of support)

Authentication type ⓘ
Individual Accounts

☒ Configure for HTTPS ⓘ

☐ Enable container support ⓘ

Копираме локалния сървър, който е с името на статия 212 – в случая, аз използвам localhost по подразбиране, но при вас трябва да е другият.

```
appsettings.json  X Shakesperiada: Overview
Schema: https://json.schemastore.org/appsettings.json
1  {
2  }
3  "ConnectionStrings": {
4    "DefaultConnection": "Server=(localdb)\\mssqllocaldb;Database=Shakesperiada;Trusted_Connection=true;TrustServerCertificate=true;"
5  },
6  "Logging": {
7    "LogLevel": {
8      "Default": "Information"
9    }
10 }
11 }
```
